The report tracks select raw materials and currencies allowing you to gain a better understanding of some of the key cost drivers in our industry.

Plastic Products Spotlight

Introducing U-pack® UV-703 from Rianlon, the next generation in light stabilizer performance for automotive compounds

As technical requirements for polymer compounds in automotive applications continue to increase, higher performance stabilizers are needed.

Rianlon and Barentz are introducing U-pack® UV-703, as the next level for stabilization performance compared to conventional HALS products for automotive interiors, exterior, and other outdoor applications providing excellent color retention and gloss stability in a variety of polymers, including PP, TPO, TPU, TPE, and PE.

Samples are available. Contact your Barentz Account Manager today at 440-937-1000, marketing@barentz.us, or visit our [website](#).

Improved Health & Safety in Compounding and Masterbatch plants with Addipel one-pack

compacted pellets

Addipel compacted pellet solutions help protect operators and create a safe, clean, and efficient manufacturing environment.

- Minimize airborne chemical exposure and dust inhalation for production employees
- Improve manufacturing plant cleanliness -- Mitigate slip and fall hazards
- Mitigate dust explosivity hazards of individual additive components
- Minimize material handling and product flow difficulties

[Click here](#) to read a case study about how Addipel helped a major automotive compounder who was having difficulty creating pellets of a critical formulation with their internal pellet making capabilities.

American Chrome & Chemicals – Chrome Green Oxide Pigments

Elementis Chromium has been rebranded American Chrome & Chemicals and they remain the only North American manufacturer of pigment grade pure chromic oxides. American Chrome & Chemicals offers the widest range of green pigment grades, the most consistent color, and tightest color specification in the industry.

- Made in the U.S.A.
- Outstanding color strength and consistency
- Micronized grades offer enhanced flow & dispersancy
- Lightfast / UV resistant
- Chemically stable
- High purity grades meet FDA requirements

American Chrome & Chemicals' chromic oxides are used in a wide variety of plastic and building product applications where consistent long-lasting color is required.

Stop importing Chrome Oxide, shorten your supply chain, and improve your quality by contacting your Barentz Account Manager today. Samples are available. Call or email us today 440-937-1000 or marketing@barentz.com or visit [website](#).

Meet Barentz Plastics

Watch this video to learn why Barentz is a world-class leader in the Plastics industry.

Bring your challenges to us and see if we can truly find a better solution for you. [Click for Video](#)
